HearthGate[®] G70

Finally, there's a way to protect children from the dual hazards of heat and fire from fireplaces, wood burning stoves and barbecues, as well as the dangerous corners and hard, rough surfaces associated with hearths. The HearthGate™ is the solution for layouts that do not have mounting points straight across. The basic gate fits hearths 6' wide by 2' deep. Larger fireplaces and wood burning stove areas may require additional sections.

Five 24" interlocking sections adjust in 10° increments and can be angled or set in a straight line as needed. Included in the 5 piece basic set is a walk through door section that opens in either direction with a simple one hand adult release.

The HearthGate is 29 1/2" high and constructed of strong tubular steel with a black, non-toxic, heat resistant finish that is easy to maintain and blends with any decor. If White finish is desired, the ConfigureGate[®] can be substituted.

Easy, lift-and-twist angle adjustment

PRODUCT SPECIFICATIONS

- For ages 6 months through 24 months
- Optional Sections are available in two sizes: 8" (Model G70-8) and 24" (Model G70-24)
- Patent: 5,890,320
- Other patents pending

No limit to the number of added sections.

G70

HearthGate®

- Specifically designed to fit standard 6' fireplace hearths
- Protects from the hazards of sharp edges, heat and fire
- Great solution for layouts where mounting points are not straight across
- Easy to adjust hinge hardware for custom fit
- Unlimited number of extensions provides superb design flexibility
- Construction: Heavy gauge tubular steel
- Basic Gate: 5, 24" interlocking sections, including walk-through door
- Height: 29 1/2"
- Colors: Black
- Optional Extensions: G70-8; G70-24 (unlimited total width)
- Patents: 5,890,320; 6,595,498

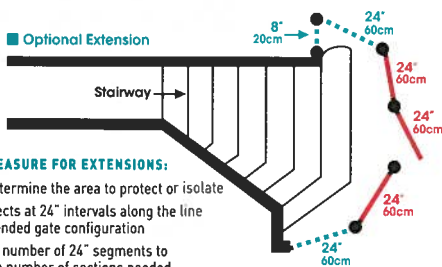

Easy, lift-and-twist angle adjustment

G80

ConfigureGate®

- Unique solution for odd shaped areas!
- Perfect for layouts where mounting points are not straight across
- Easy to adjust hinge hardware for custom fit
- Unlimited number of extensions provides superb design flexibility
- Construction: Heavy gauge tubular steel
- Basic Gate: 3, 24" interlocking sections, including walk-through door
- Height: 29 1/2"
- Colors: White
- Optional Extensions: G80-8; G80-24 (unlimited total width)
- Patents: 5,890,320; 6,595,498

HOW TO MEASURE FOR EXTENSIONS:

- Simply determine the area to protect or isolate
 - Place objects at 24" intervals along the line of the intended gate configuration
 - Count the number of 24" segments to determine number of sections needed
 - Note: For smaller incremental adjustments, use the 8" extension
- This also applies to the G70 HearthGate

Shown with optional extensions

Hearth Guard **\$710**

**Non-Adhesive
Installation!**

Soft padding to protect children from
fireplace edges
Easy installation - No Adhesive Backing!
Non-toxic, flame retardant foam
Fits hearths up to 8'

The KidCo® Hearth Guard helps protect children from serious injury if falls occur on the fireplace hearth. The uniquely shaped foam profile is designed to provide a cushiony soft protective surface; and by simply cutting the center foam section, the entire unit provides a custom fit for hearth lengths up to 8'. The two steel and foam corner pieces protect up to 18" of hearth sides. By pulling tight the strap that connects the steel corner pieces, the entire unit will snugly hug the corners of the hearth with a non-skid cushion; also preventing damage to smoother hearth surfaces like marble, slate or drywall. The foam is held in place with the innovative strapping system. Best of all, there is no sticky, messy adhesive required!

Inside non-skid cushion

Steel/foam corners provide stability

No adhesives; strap adjustment

KidCo®

EACH PRODUCT CONTAINS: 2 steel/foam corner pieces with straps • 1 foam center section
