USA

\* Heating capacity may vary from home to home.  
Contact your dealer for details.

# Hearthland Stoves™ offer two distinctive models to complement any room décor.

The Nokomis is a contemporary, euro design, while the Itasca is a charming, elegant style.

***Nokomis***  
Charcoal Metallic

***Itasca***  
Charcoal Metallic

Utilizes all natural, 100% renewable wood pellets.  
Uninterrupted burning for up to 56 hours.\*

***70 lb. Hopper Capacity***

*\*Pellet usage per hour is an approximate amount.*

## **Energy Efficient, Environmentally Friendly, and Economical**

Hearthland Stoves™ offer you the flexibility of heating only the space you want, not unoccupied rooms. Zone heating conserves energy, and lowers monthly fuel expenses. Hearthland Stoves™ are certified to be 78% energy efficient by OMNI-Test Laboratories, and burn cleaner than cord wood or coal. Simply fill the extra large hopper, set the temperature and fan speed, and heat the desired area you want.

## **Hearthland Pellet Stoves™**

are easy to operate, distribute powerful heat, and automatically maintain your desired temperature.

## **Advanced Heating Technology, Design, and Engineering**

Our state-of-the-art heating technology provides maximum heat output, while you enjoy the convenience of auto-maintained warmth. Hearthland Stoves™ have two fans, a “Dual Flow” convection fan system. The fans are positioned on each side of the firebox for maximum heat efficiency and distribution. One-touch automatic ignition, temperature and fan controls set and maintain your selected settings.

## Automatic Ignition and Temperature Control

One-touch automatic ignition and automatic Intelligent Temperature Control (ITC) system provides the ultimate in convenience. Our exclusive “set it and forget it” ITC features four heat and five fan settings for maximum flexibility in temperature and output. To accurately maintain your desired temperature, the ITC automatically adjusts to compensate for a variety of pellet brands.

## Dual Fan Air System and Large Heat Exchanger

Warms up a room in a hurry with up to 51,300 powerful BTUs per hour, and a 926 square inch heat exchanger. Hearthland Stoves™ are certified to be 78% energy efficient by OMNI-Test Laboratories. Quiet motors, blowers, and auto controls provide you tranquility in your home.

## Extra Large Capacity and Auto Feed Fuel Hopper

Uninterrupted burning for up to 56 hours\* with our 70 lb. hopper capacity. Maintains your desired heat temperature effortlessly.

*\*Pellet usage per hour is approximate amount.*

## Large Glass Area for Viewing

The exceptionally large glass area, combined with Hearthland’s “clean glass” air wash system, provide an increased view of the fire, with outstanding clarity. The Nokomis has 209 square inches of viewing glass, and the Itasca has 117 square inches.

## Exceptional Manufacturing

Over 60 years of state-of-the-art manufacturing experience assures the highest of quality. Superior craftsmanship and strict standards to manufacturing processes guarantee long-term reliability and durability. Five year limited warranty. **Made in the USA.**

## Complimentary Décor

Enhance your home with the ambiance provided by a Hearthland Pellet Stove™. The Nokomis is a contemporary, euro design, while the Itasca is a charming, elegant style.

## Direct Exhaust Ventilation

Hearthland Pellet Stoves™ are engineered to simplify installation. Direct exhaust ventilation requirements are minimal with only a 3” or 4” diameter pellet vent needed through any wall or ceiling. Please refer to the Owner’s Manual prior to installation.

## Easy Access for Cleaning and Maintenance

Intuitive and unobstructed access to internal components makes periodic cleaning and service easy.

## Remote Control or Wall Mount Thermostat Compatible (optional)

Add convenience, and specify your desired temperature with a remote control or wall mount thermostat. The thermostat can be run in high/low or auto/off modes.

**Five year limited warranty**

## Pellet Stove Specifications
